

Court-Ordered Client Treatment Process

- ❖ Client will create an account on MW Counseling's Client Portal through their EHR software and schedule a mental health assessment.
 - Client will receive all necessary documents to complete through the Client Portal before their mental health assessment.
- ❖ MW Counseling will electronically send a copy of the assessment to client's PO no later than a week after the assessment was conducted.
- ❖ Client will then engage in weekly anger management or domestic violence education for six weeks. Client will be given a certificate of completion after lesson 6 of anger management or domestic violence education and a copy will be emailed to client's PO that same day of completion.
- ❖ After anger management or domestic violence education has concluded, client will engage in mental health counseling 2x/month for 2 months. After those 2 months, client will engage in counseling 1x/month for 2 months. If there are no concerns with client's progress, MW Counseling will successfully discharge client from treatment.
 - If a client needs both anger management and domestic violence services, domestic violence education will be completed first. After completion of week 6 of domestic violence education, client will begin week 1 of anger management education that following week. After completion of week 6 of anger management education, client will only be required to complete individual counseling sessions 1x/month for 3 months.
 - Treatment may be extended due to circumstances like failed urine screens, inconsistent attendance, or client needs additional emotion support throughout treatment. Client will be unsuccessfully discharged if attendance is consistently problematic.
- ❖ After the last session of each month, MW Counseling will send client's PO the monthly progress report detailing attendance and compliance updates, unless otherwise instructed.
- ❖ Client and PO will receive a copy of client's discharge no later than a week after discharge date.
